## **DETAILED ACTION**

### ***Response to Amendment***

The Election/Restriction requirement of 8/27/03 has been withdrawn.

Claims 10 and 20 have been rejoined with original claims 1-9, 11-19, and 21-38.

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, 11-19, and 21-29, drawn to virtual machine memory heap management, classified in class 711, subclasses 6, 154, and 159.
- II. Claims 10, 20, and 30-38, drawn to a profiling event system, classified in class 717, subclasses 130.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as an event and information profiler. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
